EXPERIENCE

Freelancer	Aug 2025 - Nov 2025
Web Developer Intern	
- Developed and implemented responsive web designs, improving user engagement and overall user experience. - Optimized website performance, reducing page load times and improving site speed. - Applied SEO best practices to improve website visibility and search engine rankings.	

PROJECTS

Blood Savior
- Developed a web-based platform to connect blood donors with those in need through organized blood donation camps. - Streamlined donor registration, camp hosting, and blood requests while ensuring secure data handling and real-time updates for donors and organizers. - Utilized React.js with Chakra UI, Next.js (Node.js + API routes), DynamoDB, and AWS S3 to build and deploy the platform.
Kiranmayi Educational Institution Website
- Developed a responsive and SEO-optimized college website using React.js to provide academic information, notices, and institutional details. - Integrated Google Sheets to automatically store student registration details submitted through online forms. - Deployed the website on Vercel to ensure seamless access to academic information, admission details, and institutional updates.
